DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to an apparatus to attach IC chip, classified in class 29, subclass 760.
 - II. Claims 9-13, drawn to a process of attaching the IC chip, classified in class 29, subclass 832.
 - III. Claims 14 and 15, drawn to a computer readable form, classified in class 73, subclass 760.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). The process as claimed has to be assembled. The Group I does not require this step. Moreover the process can be carried by hand.

3. Inventions (I and II) and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of attaching the IC chip by a bolster plate (I and II) and a computer readable form (I) are unrelated as inventions (I & II) can be processed by a sensor for the chip attachment to the board.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for other Groups, restriction for examination purposes as indicated is proper.

4. A telephone call was made to the office of Mr. Peter C. Knops (816-460-5826) on September 25nd 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3729

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Tim Phan whose telephone number is 703-605-0707. The Examiner can normally be reached on M - F, 9AM - 5PM.
